

SUSTAINABILITY POLICY

We at Royal Rose Hotel, Abu Dhabi, recognize environmental protection as one of our guiding principles and a key component of our sound business performance.

We are committed to providing the highest quality Hospitality & Tourism Industry product & services in a manner that ensures a safe and healthy environment for our Associates and Guests alike. We will strive to minimize our potential impact on the environment by operating in compliance with local legislations (EAD) and Department of Culture and Tourism Guidelines.

We will/are:

- Committed to authorize necessary resources for the effective implementation of this policy
- Integrate the consideration of environmental concerns and impacts into all of our decision making and activities
- Promote environmental awareness among our associates and encourage them to work in an environmentally responsible manner.
- Train, educate and inform our associates about environmental issues that may affect their work, reduce waste through re-use and recycling.
- Promote efficient use of materials and resources throughout our facility including water, electricity, raw materials and other resources, particularly those that are non-renewable.
- Avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed
- Purchase and use environmentally responsible products that have been selected based on criteria including low toxicity or environmental hazard, durability, use of recycled materials, reduced energy and/or water consumption, reduced packaging and ability to be recycled, refilled or refurbished at end of life, where applicable.
- Develop and maintain appropriate emergency and spill response programs.
- Regularly communicate our environmental program to all our major Stake Holders and encourage them to support it.
- Strive to continually improve our environmental performance by periodically reviewing our environmental policy in light of our current and planned future activities.
