

## **Environmental Policy**

### **Environmental Commitment Statement**

At The Magnolia Hotel, we assume a clear and responsible commitment to the preservation of the environment and the promotion of sustainability in all our activities. Aware of the impact that the hotel sector can have on natural resources, we guide our actions by principles of environmental responsibility, adopting practices that minimise our ecological footprint and actively contribute to the United Nations Sustainable Development Goals (SDGs).

In this sense, we commit to:

- Promote energy efficiency;
- Reduce water consumption;
- Practise adequate waste management, encouraging separation and recycling;
- Reduce the use of disposable materials, especially single-use plastics;
- Value local suppliers, seasonal products and sustainable consumption practices;
- Sensitise and involve employees, guests and partners in good environmental practices;
- Monitor the unit's environmental performance and continuously improve our processes.

We believe that tourism can and must be a positive agent of change. Thus, we work daily to ensure that our operation respects the environmental balance, promoting a more sustainable future for all.

By choosing The Magnolia Hotel, our guests contribute to this mission and also become part of the solution.
