

Kilaguni Serena Safari Lodge

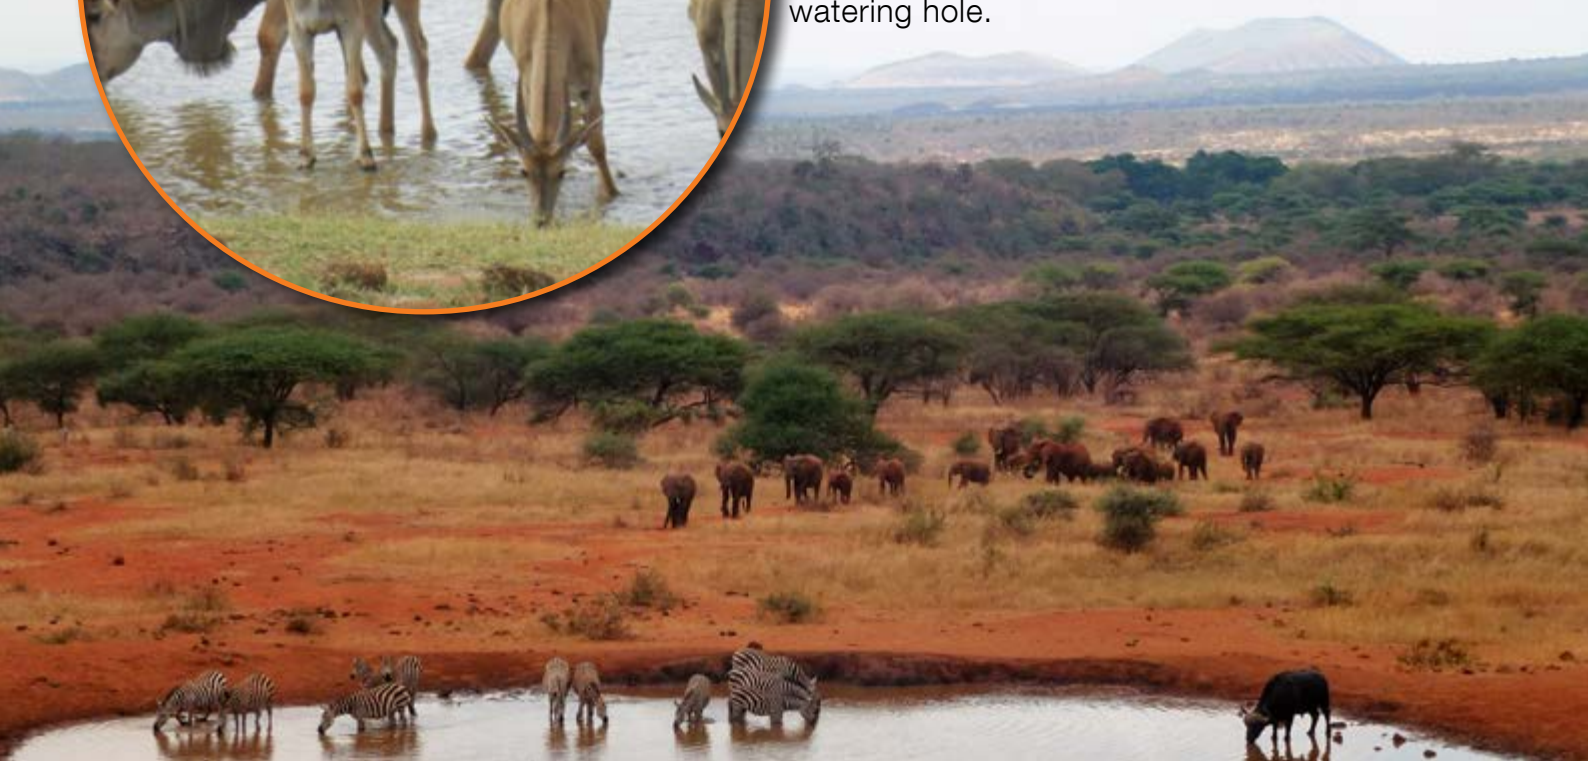

Serena Signature Experiences

Watering Hole and Viewing Deck

...sometimes you just need to relax and let the wildlife find you!

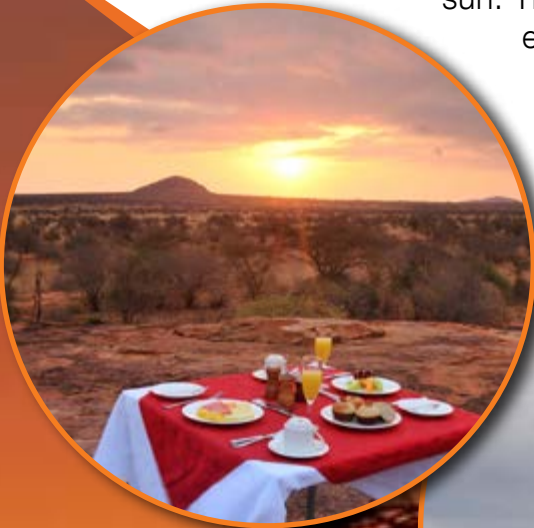

Kilaguni Serena Safari Lodge overlooks an important watering hole where a variety of animals come to quench their thirst. From the comfort of the lodge, guests get a vantage view from a viewing deck with sweeping views of the watering hole.

Bubbly Bush Breakfast On Lion Rock

Breakfast fit for a king on a rock named after the king of the jungle!

A full English breakfast prepared and served in the bush makes an ideal start to your day on safari. The Lion Rock is a vast and magnificent hump of volcanic rock, that rises from the plains and offers unique views of the plains below. Lion Rock is so called because it used to be a favorite look-out point for the lions of Tsavo, offering them both a vital vantage point and a place in which to bask in the sun. The rock may even have been used by the famous 'man-eaters' of Tsavo (a pair of man-eating lions in Tsavo that killed a number of construction workers of the Kenya-Uganda Railway in the year 1898) .

Today, however, the rock is exclusively used by Kilaguni Serena Safari Lodge- as an ideal breakfast and sundowner spot. Enjoy a gentle game drive enroute to the rock, arriving to find a full English breakfast laid out just for you; a unique experience that will leave your family with fond memories to last a lifetime!

Sundowner at Lion Rock

After a magical safari, end your day with a magical sundowner.

A sun-downer is integral to the safari life where signature cocktails are served while guests watch the magnificent spectacle of the sunset. Timed to commence as the sun starts its descent, the team departs Kilaguni Serena Safari Lodge for Lion Rock just as the evening sky turns golden-pink.

The Lion rock is an ideal look-out point with simple log-tables, which offer stunning views over the park and Mount Kilimanjaro. A full bar, complete with bitings, is also set up with the option of incorporating entertainment.

When dusk falls, you head back to the lodge just in time for dinner.

Mzima Springs

One of the best attractions that Tsavo has to offer!

Mzima Springs are a series of four natural springs in the Tsavo National Park, Kenya. The springs get their water from a natural underground reservoir producing an incredible 250 million litres of fresh water a day. These springs supply most of the water consumed in the city of Mombasa.

The lush, hippo and crocodiles-inhabited pools of Mzima springs, fed daily by millions of litres of water gushing from the lava flow of the Chyulu Hills, provide an oasis of green, underwater chamber where fish, hippo and crocodiles can be viewed.

Game Drives

Experience the daily drama that unfolds in the Kenyan Savannah!

Tsavo National Park consists of a diverse ecosystem where numerous species of wildlife are spotted on any game drive. From the tenacious elephant herds to buffalos and the big cats, a game drive in Tsavo is a must-have experience!

Both night and daytime game drives are possible to give guests the opportunity to view both diurnal and nocturnal animals.

Unique Tsavo West Sightings

Spectacular safari experiences are made up of epic scenes and unforgettable memories.

Tsavo National Park is home to numerous species of wildlife, some of which make for a very unique sighting. From the very graceful and elusive leopard to rare melanised cats to spectacular game hunts involving lions, hyenas and the rare wild dogs, Tsavo West is a must visit.

Lions feast on a buffalo as the “revenge squad” arrives to rescue one of their own.

Chaimu Crater

One of the few but most memorable hiking opportunities in the Tsavo!

Chaimu crater offers a spacious parking area and an exciting scramble up to this volcanic cinder cone that leads to the crater's rim. This is an excellent spot for hiking.

The Shetani Caves and Lava Flows

When the spectacle of past geological activity is too breathtaking that locals associated it with supernatural powers!

The volcanic convulsions of Tsavo's landscape are riddled with lava flows, the most spectacular being the Shetani Lava flow, a coalesced tide of tar-like lava that spewed down the Chyulu Hills as they burst out of the plains only a few hundred years ago. Shetani means 'devil' in Swahili and refers to the time, relatively recently, when the molten lava erupted from the bowels of the earth and engulfed the area. So terrifying was this event to the local people that they believed it to be the devil incarnate and the tales are still rife of fire, hails of brimstone and evil spirits. The lava flow is also riddled by a series of caves, many of which can be explored, though caution is recommended.

Roaring Rocks

A view of the Tsavo National Park from a vantage point where the wind howls into your ears!

Once climbed, the Roaring Rocks provide amazing panoramic views, usually only seen by the eagles and buzzards that fly around these cliffs, over the plain called Rhino valley and the Ngulia. The Roaring rocks, located near the Rhino Sanctuary, has been for long an observation point for the protection of the black rhino and the fight against poaching.

The eerie Roaring Rocks are named after the buzz of cicadas that inhabit them and the howl of wind that hits the bare rocks, producing a roaring sound.

Bush Dining

When the food couldn't get any better, throw in a view to die for!

Adjacent to the Lodge is our dedicated bush barbeque area, which overlooks the Chyulu Hills and is traditionally lit with safari lanterns. Reached by a winding, lantern-lit pathway from the lodge, it features a stone-built buffet-area, bush bar and a glowing charcoal barbeque. Here, our chefs prepare a lavish 7-course banquet, which is served to individual tables gathered around a blazing fire-pit. At the end of dinner, our guitarist entertains you as drinks are served around the bonfire. A special cultural dancing troupe may also be at hand to entertain you.

Bike Riding

Keep fit even as you enjoy your safari.

Exercise is a vital ingredient for a wholesome life and we believe that your safari experience should fuse in a little exercise too.

At Kilaguni Serena Safari Lodge, we have special bike riding tracks within the safety of the lodge where you can ride as you take in the fresh air. You might actually encounter wildlife across the fence and live to tell a tale of the most memorable bike ride.

Nature Walk

Understand the flora and fauna of the Tsavo West.

With some of the most knowledgeable naturalists, we have developed a track around the lodge that travelers can walk through.

This walk takes you through an educative encounter of various flora and fauna including skeletal remains of elephants, buffalo and giraffe. Our naturalist will explain every feature of the skeletons as well as explain the medicinal value of the plants.

It truly is the best way to experience the park first hand!

Sustainability

Renewable Solar Energy

The way to go for a sustainable world!

In a bid to save the environment and operate sustainably, Serena Hotels has been looking to tap into renewable energy sources such as solar power. This replaces reliance on fossil based energy to renewable energy as well as ensures an effective energy management. Kilaguni Serena Safari Lodge has been fully solar powered off-grid since 2017.

Corporate Social Responsibility

A responsible organization is cognizant not only of the needs of its customers but also of the very ground it is set up on!

Working within the regions we operate, Kilaguni Serena Safari Lodge engages in many programmes to tackle environmental issues such as afforestation as well as contributes to the general welfare of the communities living around it.

The lodge is especially passionate about the nurturing of future generations by contributing to child rescue centers as well as schools. Guests are welcome and encouraged to join in our CSR activities to ensure they leave a positive footprint long after their stay.

Meetings, Conferences and Incentive Groups

If you need to break from the norm, make your next meeting most exciting!

For corporates looking for out-of-town venues for their meetings and conferences, we have the perfect solution.

With a host of activities to engage in between the meeting sessions, we can tailor your itinerary to ensure you are both productive as well as fully immersed in the magic of the Tsavo!
