Safe and healthy at Hotel MOTTO

Dreamy, diverse, and above all completely relaxed - that's how we love our hotel MOTTO. To us, nothing is more important than the well-being, safety, and health of our guests and employees. That is why we have implemented a number of safety measures to ensure an unforgettable, fully enjoyable MOTTO experience.

You are safe with us!

Our staff is always up to date and well trained when it comes to the current COVID19 regulations and the appropriate hygiene measures. And by the way, our employees are already vaccinated or otherwise are being tested twice a week.

Thoroughly clean and thoroughly relaxed

For a pleasant and safe experience, all public areas of our hotel are equipped with hand disinfection dispensers from the Viennese "Saint Charles Pharmacies". Ongoing cleaning and disinfection provide additional protection. Our ornate door handles, elevator buttons, metal surfaces, etc. are thus not only beautiful to look at, but always spotlessly clean - we pay particular attention to this. Only cleaning agents that are highly effective, disinfecting, and eco-friendly are allowed in our hotel rooms. The bed linen, tablecloths, and towels are thoroughly cleaned in accordance with certified hygiene standards as well. All rooms are ventilated on a daily basis to ensure that you can breathe carefree. For those who like to take ventilation into their own hands, the room windows can be opened and closed easily.

At Chez Bernard, hygiene is an absolute priority as well. Hotel guests can enjoy their breakfast à la carte and with appropriate room between the tables. For our classy event rooms, we have developed a special safety concept.

This way, your party, workshop, or meeting can be held in a carefree way and without any restrictions. We offer flexible rates as well as short-term cancellation conditions, so that you can plan your stay with us without the slightest concern. Currently only business meetings are allowed.

Enjoy the Hotel MOTTO carefree, relaxed and safe!
