

SUSTAINABLE PROCUREMENT POLICY

At CVK Hotels & Resorts, within the scope of our sustainable supply approach, we care that our solution partners possess Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems, internationally recognized environmental and sustainability labels/certificates; that their production and procurement processes do not cause harmful environmental impacts; that they use and consume resources appropriately, with respect for wildlife and without damaging biodiversity; that products obtained through illegal hunting are not included in the supply chain; that they work to minimize waste and manage it properly; that they offer reduced packaging or bulk packaging alternatives; and that they provide environmentally friendly, efficient, local, ethically sourced, recyclable or recycled, organic, bio, vegan, cruelty-free, and non-toxic alternatives.

We prioritize working with local and domestic producers/service providers, and with products or services that reflect and promote the cuisine, traditions, and culture of our country and region. We convey this perspective to our stakeholders.

Together with our suppliers, we strive to create efficient procurement opportunities and aim to reduce the environmental impacts arising from procurement processes.
