Our sustainable initiatives

Being a resort located within the marine protected area of Capo Carbonara is an experience that has taught us so much in terms of knowledge and respect for the wonderful natural habitat that surrounds us. We feel responsible for the stretch of coastline where we welcome you and respond punctually to all requests from the authority that manages the marine area. In addition, we are committed to passing on lessons we have learned and sensitivity to environmental issues.

- **One, two, tree:** for an additional contribution of 20,00 Euro on any reservation, we will plant a myrtle or mastic tree shrub within the resort to reduce the CO2 impact of guests' trips.
- **Falky Rangers:** kids are usually the most sensitive guests to sustainability issues, and we are proud of this. Therefore, it is to them that we dedicate specific activities through an edutainment programme that includes Falky Rangers activities.
- **Activities in nature:** we offer activities that allow people to discover and learn about Capo Caronara Marine Protected Area in a mindful and nature-conscious way. There are many activities that allow you to gain knowledge and develop sensitivities while having fun and enriching yourself.

Falky & Falcon rangers

- Protect & explore the nature reserve of Capo Boi with our Rangers Project.
- Together with our dedicated Team, kids go out to discover the nature of our Resort, learn about vegetables in the hotel gardens and animal in our petting zoo such as local donkeys and baby goats.
- The rangers programme includes specific edutainment activities like painting with nature, water purification, water and its misteries, recycling activities.
- There are also workshops to learn about topics such as reuse and recycling.
- At the end of the day, together we analyze the newly acquired knowledge to consolidate awareness of environmental issue.
