

DAYDREAM
ISLAND

Imagine a place beyond the horizon.

Welcome to Daydream Island Resort

Following an extensive redevelopment, Daydream Island Resort now offers 280 refurbished guest rooms and suites, with interconnecting rooms suitable for families, and special access rooms.

With an expanded Food and Beverage offering, the Island offers 3 new restaurants and 3 new bars, including an exciting new Asian Fusion restaurant which joins the buffet and modern Australian restaurant.

The island has a revitalised pool landscape allowing you to swim and enjoy unparalleled views across the Whitsundays. The swimming hub is complemented by a poolside bar inclusive of a new burger concept.

The Living Reef also makes its return to the island in an even bigger and better capacity than before, with the free form coral lagoon wrapping 200m around the central building and holding over 1.5 million litres of water. Join the team of marine biologists and over 100 species of marine fish, rays, coral and invertebrates such as starfish, sea cucumbers and crabs.

A trip to Tonic will be the only concoction you will need to relax and rejuvenate on the island.

BAREFOOT BAR

Centrally located amongst the lush gardens by the revitalised pool landscape, Barefoot Bar is an outdoor venue where you can relax with a burger or swim up and order a drink while enjoying your time in the pool.

Explore a world that is extraordinary.

Living Reef

The beating heart of Daydream Island is our eco-friendly and educational Living Reef. This famous coral lagoon is back bigger and better than ever – wrapping over 200m around the central building and holding an impressive 1.5 million litres of water. Shake fins with a baby stingray, spot starfish and sea cucumbers, get up close to a crab, and discover over 100 unique species of marine fish. With group tours, underwater observatory, and hands-on experiences with our resident marine biologists, there's plenty of ways to see, touch and learn.

Enter the Living Reef and take a splash with our baby rays or get close and personal with some of the residents of the Living Reef, including colourful fish, baby reef sharks and sea stars, and experience the resort's brand-new Touch Tank. Finish the tours with an educational talk and tour into our Underwater Observatory.

Experience the Living Reef by taking a guided tour with our resident Marine Biologists.
