

## Our Ecological Footprint:

Constituting one of the main concerns that our planet faces today, the preservation of the environment is also a priority of the Hotel Cascais Miragem.

The Hotel Cascais Miragem carries out the following actions to preserve the environment:

- Use of glass and double walls for better thermal insulation;
- Thermal solar panels for water heating in conjunction with high-efficiency condensing boilers;
- WCs equipped with a double water drain, thus contributing to a 30% reduction in water consumption, as well as flow reducers in washbasins and bidets;
- Rooms are equipped with AC systems that allow energy reduction whenever a door or window is opened;
- Protected porch flooring to avoid solar heating and 15% of rooms have wooden flooring;
- Waste reduction and recycling program for amenities, paper, glass, plastics, metals, oils and fats;
- Elimination of single-use plastics;
- In the rooms our clients have the option of changing towels and sheets;
- Led lightning;
- Drop by drop irrigation in gardens to save water and use rainwater for watering gardens;
- A main switch in each room to avoid unnecessary energy expenditure;
- Project for the implementation of a large area of photovoltaic panels with a view to near energy self-sufficiency;
- Environmental programs in the rooms giving our customers the option to contribute to helping the environment by choosing to change towels and sheets;

We are proud of all the goals achieved so far, and we also invite our customers to join us in this initiative to protect our planet, as we know that every little gesture makes a difference!
