

Sustainable Stays Measuring Our Impact

What we have done ...

We have been measuring our overall Scope 1 + 2 emissions since 2021.

This year we have been working on our full carbon footprint (Scopes 1, 2 + 3) and are now a Planet Mark Certified Business.

For the first time, we are now able to see the full picture of our emissions and appreciate the scale of our challenges, not surprisingly with the most significant chunk coming from our Purchased Goods and Services.

This represents the beginning of our decarbonisation journey.

Where we are heading ...

We still have a lot of work to do to set genuine and realistic decarbonisation targets, so we will not add empty commitments until we feel sure that we can stand by them.

We do however remain committed to a net zero future and working towards this by no later than 2050.

This Impact Report focuses on our 14 operational hotels. It should be noted, however, that we do have two additional properties that are currently let to third parties and that our Scope 1, 2 + 3 emissions data for all properties was included in the Planet Mark Business Certification.

Spotlight on: Planet Mark

Planet Mark help businesses to understand their carbon emissions, and inspire them to take action and empower them on their journey to net zero.

With their unique model - measure, engage, communicate - their data analysts, engagement experts and communications specialists work together as one unified team with a shared goal: to help businesses like ours to reduce carbon emissions and meet net zero targets.

Total carbon footprint by emission source (market-based) for YE 2024

- Fugitive Emissions
- Stationary Fuels
- Electricity
- Category 1: Purchased Goods and Services
- Category 3: Fuel- and Energy-Related Activities
- Category 5: Waste
- Category 6: Business Travel
- Category 7: Employee Commuting
