VISIT TO MZIMA SPRINGS*

Mzima Springs is a peaceful oasis at the heart of red-dusty Tsavo. Filtered by porous sponge-like soil, the water from the Chyulu Hills and the Shetani lava flow sustains a unique ecosystem 40 kilometres away. It's a haven for fishes, birds, monkeys, crocodiles and hippos. The main attractions are the two nature trails leading to an underwater viewing tank.

VISIT TO THE SHETANI CAVES AND LAVA FLOWS*

A black lava flow of 8 kilometres, 1.6 kilometres wide and 5 metres deep, are the remains of volcanic eruptions. They were the subject of tales among local communities who named the flow "shetani," meaning evil in Kiswahili, after it spewed from the earth when it was just 240 years old. Climbing the flow isn't an easy task, as the thick, black soil is composed of uneven chunks of solid magma.

ROARING ROCKS*

Over the plain called Rhino Valley and Ngulia, the Roaring Rocks, located near the Rhino Sanctuary, have long been an observation point for the protection of Black Rhinoceros. Once climbed, they will give you magnificent panoramic views, usually only seen by the eagles and buzzards that fly around these cliffs. These rocks are named after the buzz of cicadas that inhabit them and the howl of the wind that hits the bare rocks.

BUBBLY SUNDOWNER AT LION ROCK *

Sundowners are an essential part of safari life and date back to the time of the great safaris of the 1920s when elegant cocktails were served while watching the spectacle of the African sunset. Timed to begin as the sun starts its descent, the sundowner opens with a gentle evening game drive, arriving at the site just as the evening sky turns gold-pink.
