

ENERGY POLICY

At CVK Hotels & Resorts, we aim to implement and continuously improve a proactive energy management system based on sustainable development in all our activities.

In this regard,

- Ensuring the efficient use of energy and natural resources in all operations,
- Applying environmentally and energy-friendly technologies in new projects and equipment acquisitions,
- Achieving energy savings and reducing the consumption of natural resources by implementing efficiency-enhancing improvements in existing processes and systems,
- Continuously improving energy performance through the design and procurement of energy-efficient products, processes, and services,
- Providing adequate resources (information, expertise, and financial means) to achieve energy-related goals and objectives and reviewing them regularly,
- Ensuring compliance with legal and other requirements related to energy efficiency, usage, and consumption,
- Raising awareness among all stakeholders about renewable energy and climate change, and developing energy efficiency projects that support the principle of sustainable development,

are our commitments.
