

GREEN PROCUREMENT POLICY

CARLTON HOTEL SINGAPORE

This green procurement policy has been set up to provide guidance in the purchasing of products and services that meet the environmental goals of the building. Product purchase will be done based on Carlton Hotel Singapore's commitment to its safe and responsible management of its building in the most efficient and environmentally-friendly manner possible.

The following considerations will be taken into account before purchasing any new products:

- Prioritize purchase selection of environmentally-friendly products certified by local certification bodies.
- Decrease the use of toxins which are detrimental to human health and to the environment by first looking into the material composition of potential purchases.
- Purchase (wherever feasible) those products that contain the highest possible percentage of pre and post-consumer recycled content (at least 30%).
- Reduce the amount of waste that our purchasing methods produce.
- Check the Singapore Green Label products website for current lists of available eco-friendly items before considering final purchase.

The purchase of the following product shall be limited to only green label products or those meeting the above requirement:

Hand towels

Floor cleaners

Detergent

By adopting this policy, Carlton Hotel Singapore hopes to reduce the impact on the environment.
