

HOTELS & RESORTS

## ENERGY EFFICIENCY POLICY

At CVK Hotels & Resorts, CVK Park Bosphorus Hotel, our approach is based on continuous improvement, compliance with guest requirements, and fulfilling expectations by providing healthy and high-quality products at the highest level.

We aim to continuously review and improve our system in line with legal requirements,

In this context:

Within the framework of ISO 50001:2018, we aim to use energy and natural resources efficiently in all our activities, ensure the use of environmentally and energy-friendly products and technologies, achieve energy savings in our processes and systems, reduce the consumption of natural resources, and ensure the continuous improvement of our energy management system by developing energy efficiency projects with a renewable energy perspective,

We aim to provide high-quality service with a focus on trust and integrity,

We place great importance on internal information flow and coordination,

We provide continuous training on energy management systems to ensure the ongoing development of our employees, enhancing team spirit and employee satisfaction,

We work with a team-oriented approach,

This is our Energy Efficiency Policy.

The management of CVK Hotels & Resorts, CVK Park Bosphorus Hotel, commits to communicating this policy to all employees and ensuring its understanding. This policy provides a framework for setting objectives and is continuously reviewed.
