**FOR IMMEDIATE RELEASE**

**The Grove Hotel Has Achieved GBAC STAR™ Facility Accreditation**

[BOISE, ID] – July 23, 2021 – The Grove Hotel has announced that it has achieved Global Biorisk Advisory Council® (GBAC) STAR™ accreditation, the gold standard for prepared facilities. Under the guidance of GBAC, a Division of ISSA, the worldwide cleaning industry association, The Grove Hotel has implemented the most stringent protocols for cleaning, disinfection and infectious disease prevention in its facility.

As the cleaning industry's only outbreak prevention, response and recovery accreditation, GBAC STAR™ helps organizations establish protocols and procedures, offers expert-led training and assesses a facility's readiness for biorisk situations. The program verifies that The Grove Hotel implements best practices to prepare for, respond to and recover from outbreaks and pandemics.

“GBAC STAR accreditation empowers facility owners and managers to assure workers, customers and key stakeholders that they have proven systems in place to maintain clean and healthy environments,” said GBAC Executive Director Patricia Olinger. “By taking this important step to pursue GBAC STAR, The Grove Hotel has received third-party validation that it follows strict protocols for biorisk situations, thereby demonstrating its preparedness and commitment to operating safely.”

To achieve GBAC STAR™ accreditation, The Grove Hotel was required to demonstrate compliance with the program's 20 core elements, which range from standard operating procedures and risk assessment strategies to personal protective equipment and emergency preparedness and response measures.
