

SUSTAINABILITY POLICY

At our hotels, we are committed to sustainability and environmental responsibility. We believe that every little effort counts towards making the world a greener and cleaner place for future generations. Here are some of the key aspects of our internal sustainability policy: o

- 1. WASTE SEPARATION:** we duly sort waste throughout all hotel operations. This practice includes separating plastics, paper, organic waste, metals, and electronic waste. Doing so reduces our environmental footprint and contributes to the responsible disposal of materials.
- 2. TOWEL AND BEDDING REUSE:** to minimize water and energy consumption, we offer our guests the option to reuse towels and bedding during their stay. We change them only when our guests place them on the bathroom floor, indicating their preference for fresh linens.
- 3. ECO-FRIENDLY CLEANING PRODUCTS:** we exclusively use cleaning products that carry bio-degradable certifications. These products are not only effective but also environmentally friendly, ensuring that our cleaning practices are gentle for the planet.
- 4. ZERO FOOD WASTE:** we are committed to reducing food by carefully managing our kitchen operations. Our chefs work diligently to minimize food waste while still providing our guests with delicious meals.
- 5. LOCAL AND SEASONAL SOURCING:** we take pride in using predominately local sources and seasonal ingredients in our food offerings. By supporting local producers and using seasonal products, we reduce the carbon footprints made by transporting goods over long distances.
- 6. PAPERLESS ARCHIVING:** To reduce paper usage, we use electronic archiving systems. All documents (besides those which are not required to be stored printed by local authorities) and records are stored digitally, minimizing our environmental impact.
- 7. DIGITAL COMMUNICATION:** We prioritize online communication and provide links as well as QR codes.

We are committed to ongoing improvements. We continuously seek out new and innovative ways to be even more environmentally responsible. Our dedication to sustainability is a journey that never stops and we are always exploring opportunities to reduce our ecological footprint while maintaining the high standards of services and comfort for our valuable guests.
