HISTORY

Imagine a magic place,

A special place of light and colour, a place of peace.

*A place for a family to live, set against the blue of the Mediterranean,
surrounded by centuries-old palm and rare plants,
an invitation to control the passage of time*

*In this atmosphere of plenitude, 3 women, a mother and two daughters,
found inspiration in the varied and alluring scents of the plants.*

*They studied their secrets and their properties,
including the perfect resistance of some to climate variations.*

*Five years ago, this wonderful chemistry gave birth to a range of
cosmetics, Chateau Berger, with its subtle essences, sophisticated ingredients and
unique textures, combining the benefits of sea and land.*

*The Chateau Berger range of Cosmetics embodies beauty,
rigour and the elegance of youth.*

MARSEILLE AND THE MEDITERRANEAN, AN ENVIRONMENT CONDUCTIVE FOR THE ART OF TAKING CARE FOR ONESELF

Meticulously created in the demanding professional context of a cosmetic surgery clinic and spa, Château Berger cosmetic products optimize your beauty capital, care routine after care routine. Visible results on the skin are the daily proof of its rejuvenation.

THE BRAND'S ORIGINALITY COMES FROM COMBINING THE BENEFITS OF SEA AND LAND

Our formulas combine powerful plant-based and marine active ingredients in high concentrations to meet the specific needs of the skin through the daily care routines required by a demanding clientele.

PASSION AND PROFESSIONALISM MEET HERE

Ardour and determination were the ingredients that enabled Laurence Fogli to develop the Chateau Berger cosmetics range with her daughters Lilou and Marion.

These 3 women, representing two generations and three different skin tones, took a new look at cosmetics and created an innovative product line, associated with the joys of life, nature and passion.

Lilou, who is an actress, became the brand's muse and manages communication. Marion is in charge of marketing, product display and the design of original packaging.

This gave rise to the concept " Beauty at any Age."
That of taking a new look at cosmetics.

A CONCENTRATE OF HIGH STANDARDS AND PERFORMANCES FROM COSMETIC MEDICINE

Your skin is sublimely enhanced, through attentiveness to its needs and the respect of its balance.

SETTING OUR COURSE TOWARDS BEAUTY AND YOUTHFULNESS FOR YOUR SKIN

Action on the skin

Knowing how to have and to keep beautiful skin on a daily basis is one of the secrets of a youthfulness that resists the ravages of the passing of time.

It is essential to nourish the skin and moisturize it in order to maintain its youth and beauty in the best possible conditions.

The key concept of this range is use a high percentage of natural active ingredients acting at different levels

to provide real anti-radical and anti-stress protection. These active ingredients stimulate the metabolism and cell renewal.

By targeting cell failure and restoring the skin barrier to optimize moisturizing*, our creams promote skin elasticity and firmness and their action delays the appearance of wrinkles.

Olfactory dimensions and sublime textures

Historically, special care has always been taken to develop the creams, which actively fight to rejuvenate the skin. Enjoyment quickly followed this stringent foundational principle through the pleasure involved in using

these rich, subtly perfumed creams, which correspond perfectly to this two-fold expectation of effectiveness and enjoyable use.

WHEN SCIENCE STRIVES FOR BEAUTY

Dr. FOGLI's serum

Alain Fogli Aesthetic surgeon

Over 40 years' experience in aesthetic surgery, along with lectures and international events focusing on face rejuvenation have yielded some clear findings:

"Ageing of the face and neck is characterised by ptosis, i.e. the descent of all tissues.

We could compare this to a mountain landslide that is, in this case, made up of bone! It is thus easy to understand that effective action can only be achieved through techniques that reposition anatomical structures by acting on the muscles and adipose volumes.

In addition, the quality of the skin, its thickness, trophicity, hydration and glow are a great asset. We mustn't forget that this wonderful skin tissue is exposed throughout its life to external agents and the ageing process."

This is where the scientific process really comes in. This serum is made up of high-performing active ingredients combined in finely controlled doses for maximum efficiency to improve and maintain skin quality. It responds to the latest cosmeceutical developments.

Available soon

Dr. FOGLI's serum :

25% Pure Vitamin C - Vitamin E - Ferulic Acid - Hyaluronic Acid
- Vitamin B5

This serum improves the skin's elasticity, firmness and evenness. Vitamin C in high concentration has powerful anti-radical properties and stimulates the production of collagen and elastin. Ferulic acid increases the photoprotective power of vitamins C and E, thus doubling their effectiveness and enhancing their ability to neutralize free radicals. Vitamin B5 is anti-inflammatory, it soothes and stimulates the cellular renewal. Hyaluronic acid ensures good skin hydration.

Indications :

Loss of radiance. Irregular complexion. Wrinkles, fine lines and pigment spots. Prevention and protection against damage from sun, tobacco, pollution, oxidative stress.

Use: Preferably in the evening, before skin ritual, put a few drops in the palm of the hand, pat the face, neck, and décolleté to make the product pénétrare the skin. Only one application is sufficient.

Results :

Luminous, smoothed and uniform skin, harmonized complexion, reduced pigment spots, faded fine lines, protection and prevention. Powerful, effective, this highly dosed serum can be used all year round.
