WATER - PURIFIED WATER

Red Cliffs culinary water comes from a deep well that is pure but has a lot of mineral content. Well water can be unpleasant tasting and even cause upset stomach to those not acclimated to it. The regular taps in your room produce hard water. Every room has a **SKINNY FAUCET** in the bathroom and kitchen that provides pure filtered water. Please use this water for drinking only as the supply is very limited each day. All drinking water in the lodge, restaurant and ice machines is purified.

PARKING AT THE CABINS

Please park on the right side of road, **NEXT TO THE CABINS**. Cars parked on the left side near the pasture are subject to over-spray from the sprinklers that will leave undesirable hard water stains!
